

New ballistic helmets

Tuesday, 19 August 2008

BAE Systems helmets are the next generation of lightweight, high-performance protection. These helmets are designed for comfort and to provide maximum protection by incorporating the latest technology in ballistic composite construction.

BAE Systems offers a range of helmet options to suit unique mission needs, with varying weights and ballistic protection levels, as well as optional ballistic and non-ballistic face shields.

BAE Systems' helmets include:

- Army ACH (Advanced Combat Helmet)
- Warrior Helmet

Product Features:

- Two-component polyurethane paint allows decontamination after exposure to liquid chemical agents
- Adjustable and replaceable standard 4-, 3- and 2-point chin straps
- Comfort pad or webbing suspensions available on all combat helmets
- State-of-the-art ballistic composite construction
- Integrated outer shell and suspension system provides a stable, comfortable fit
- Next generation helmets integrate communications and electronics as well as NVG systems
